EDUCATION

California State University, Monterey Bay

Computer Science Major

Software Engineering Concentration

Relevant Coursework: Intro to Data Structures and Algorithms, Software Design, Intro to Computer Architecture, Intro to Computer Networks, Internet Programming, Design & Analysis of Algorithms, Software Engineering (IP)

Major GPA: 4.0

Marina, CA

Expected Graduation Fall 2026

UNIVERSITY PROJECTS

Public Agenda - CSUMB Hackathon

April 2026

- Created an app in React Native to aggregate public government meeting information from count websites and provide AI generated transcript, timestamps, summary, and chat window
- Used FasterWhisper for audio to transcript conversion
- Hosted local AI agent as endpoint for chat window

ACTIVITIES

California State University - Monterey Bay

Fall 2025 - Present

Teaching Assistant (Intro to Data Structures, Analysis of Algorithms)

- Supervised Lab and Peer Learning Sessions for class of over 30 students
- Held office hours and graded homework for over 90 students

RNAMotifContrast Web Service

Undergraduate Research Opportunity Center

Summer 2025

- Designed RNAMotifContrast Web Service during Summer Research Program
- Created front end using **Next.js** and **React** that allows users to upload files
- Created display page using **Babylon.js** and RNACanvas npm package to show interactive RNA structures for visual analysis

Eclipse PDE

CTI-CodeDay SWE Micro-Internship

July - August 2025

- Contributed to Eclipse PDE, part of the Eclipse IDE, an open source IDE for **Java** development with 4.5 million downloads per release
- Added support to change the filter attribute for dependencies in the UI editor, allowing users to easily write to the .xml file and set a filter with **OSGi** syntax

RNA 3D Research Lab

Spring 2025 - Present

Undergraduate Research Assistant

- Designed home website for Research Lab using TypeScript and components from Mantine.dev
- Assisted transition of DisceRNA canvas to babylon from three.js

CSUMB Programming Team

Spring 2025 - Present

- Team Member

Google Sponsored CSUMB Hackathon

March 2025

- Fifth Place

ADDITIONAL

Technical Skills: Advanced in Java, Javascript, Typescript; Proficient in C++, Python
